

Press release

Kallisto is Sintratec's new reseller in France

The 3D printing specialist Kallisto is now an official sales partner of Sintratec in France. Sintratec, the market leading Swiss developer and manufacturer of compact SLS 3D printers, thereby continues to expand its global distribution network and focuses on improving the customer experience.

Brugg, 29 March 2018 – Sintratec is further expanding its distribution network by cooperating with the French 3D printing specialist Kallisto. Kallisto has been in the 3D printing industry for quite a while. Founded in 1999 the company now has agencies in Paris, Toulouse, Lyon, Bordeaux and Arras. Kallisto's full service includes detailed consulting about all kind of 3D technology solutions, the implementation and integration of hardware and above all training, trouble shooting and maintenance of equipment and software.

“Kallisto has profound knowledge in 3D technology for many years and is dedicated to an excellent customer experience. With this cooperation we can offer our customers shorter delivery times, quick professional consulting and support on-site. We are absolutely certain that our customers in France are in good hands with Kallisto,” says Gabor Koppanyi, Head of Marketing and Sales at Sintratec.

By adding the Sintratec Kit and the Sintratec S1 to its product portfolio, Kallisto completes its assortment with two desktop SLS systems. Pascal Erschler, Manager of Kallisto says: “The Sintratec 3D printers are a great opportunity for our customer to get to know the SLS technology and integrate it into their processes – for example to create small serial parts at an affordable cost.”

About Sintratec

Sintratec is Switzerland's leading 3D printer manufacturer and specialized in the development and production of SLS 3D printers. The range includes compact laser sintering systems which process high quality polymers. Sintratec's laser sintering technology allows the production of complex and freeform objects which meet demanding part resolution, robustness and temperature standards. Many hundreds of professional Sintratec machines are in operation around the world in various industries, universities and research institutes.
