

Press release

## BIBUS MENOS is Sintratec's reseller in Poland

**Sintratec expands its distribution network to Poland and therefore cooperates with [BIBUS MENOS](#) now. The Polish trading, service and production company has the compact swissmade SLS 3D printers from Sintratec in its product portfolio now and ensures a professional customer service on site.**

**Brugg, 4 April 2018** – Sintratec, the leading 3D printer manufacturer for compact SLS 3D printers, announces its first strategic partner in Poland. Headquartered in Gdańsk, Poland, BIBUS MENOS has more than twelve years of experience in the 3D printing industry and dedicates itself to a comprehensive customer service. The Polish distributor offers six different 3D printing technologies and now completes its product portfolio with the [Sintratec S1](#) and the [Sintratec Kit](#).

"We are pleased to have found an experienced partner who provides professional support to our customers in Poland. Poland is an extremely interesting market that is growing rapidly. Especially in mechanical engineering and in the process industry, where our high-quality compact SLS 3D printers are in great demand for the production of functional prototypes, a lot is going on," says Gabor Koppanyi, head of marketing and sales at Sintratec.

Tomasz Weis, team leader at BIBUS MENOS adds: "We see great potential in the solutions that Sintratec is developing. Customers in our country are looking for 3D printers that guarantee high quality combined with an affordable price. We believe that the Sintratec S1 and the Sintratec Kit will open many new opportunities for customers who are interested in SLS technology."

From April 10 to 12, 2018, BIBUS MENOS will present the Sintratec SLS systems at the "3D Printing Days" at the Kielce Trade Fair Center in Kielce, Poland.

### **About Sintratec**

*Sintratec is Switzerland's leading 3D printer manufacturer and specialized in the development and production of SLS 3D printers. The range includes compact laser sintering systems which process high quality polymers. Sintratec's laser sintering technology allows the production of complex and freeform objects which meet demanding part resolution, robustness and temperature standards. Many hundreds of professional Sintratec machines are in operation around the world in various industries, universities and research institutes.*
