

Press release

Sintratec arrives in the USA

Sintratec expands its distribution network to the USA. 3D printing expert 3DChimera from Miami, Florida now offers the *Sintratec Kit* via its [online store](#) and serves and supports the local Sintratec customers. With this cooperation, Sintratec can optimally serve local US customers and shorten delivery times for the US market.

Brugg, 4 June 2018 – Sintratec, the leading 3D printer manufacturer for compact SLS 3D printers, announces its first reselling partner in the USA.

3DChimera is a full-service 3D printing specialist located in Miami. The company, founded in 2013, dedicates itself completely to the 3D printing world. Next to 3D printers of various technologies and in different price ranges, 3DChimera also offers 3D scanners, printing materials, product design, consultation and training. With the *Sintratec Kit* they complete their product portfolio by the highly demanded SLS technology.

“We love new technologies which help us solve business problems in new and exciting ways. Sintratec’s compact SLS systems offer exactly what our customers are looking for: rapid and functional prototyping at an affordable price,” says Alex Hussain, CEO of 3DChimera.

Dominik Solenicki, CEO at Sintratec is convinced by the partnership too: “We are seeing a great demand for our products in the American market and 3DChimera helps us to serve them optimally. The passion for 3D printing plus the expertise the highly motivated team from 3DChimera shows, have convinced us immediately.”

About Sintratec

Sintratec is Switzerland’s leading 3D printer manufacturer and specialized in the development and production of SLS 3D printers. The range includes compact laser sintering systems which process high quality polymers. Sintratec’s laser sintering technology allows the production of complex and freeform objects which meet demanding part resolution, robustness and temperature standards. Many hundreds of professional Sintratec machines are in operation around the world in various industries, universities and research institutes.
